The daily team classification will be determined by the sum of the three best times of the stage result of each team. In case of a draw, the teams will be classified by the sum of the positions of the three best riders of that team in the stage classification.

If this results in a draw again, then the teams will be classified according to the position of the best rider of the team in the stage classification.

The General Team Classification will be calculated based on the sum of the results achieved by the teams in the daily team classifications of the stages.

In case of a draw, the following criteria will be used to separate the teams:

- 1 The number of first places in the daily team classifications;
- 2 The number of second places in the daily team classifications, etc..

If this results in a draw again, the teams will be classified according to the location of the best rider in the overall individual standings.

Any team reduced to fewer than three riders participating in the contest will be excluded from the team classification.
